

# Sprint Retrospective, Iteration #5

Context Project: Pang

Group: -1

| User Story #   | Task #                                       | Task Assigned To                        | Estimated Effort per Task<br>(in hours) | Actual Effort per Task<br>(in hours) | Done<br>(yes / no) | Notes |
|--|--|---|---|--------------------------------------|--------------------|-------|
| As a student I have to remove 10 if- or case-statements                      | Remove 5 if- or case-statements              | Erik                                    | 3                                       | 3                                    | yes                |       |
|  | Remove 5 if- or case-statements              | Govert                                  | 3                                       | 3                                    | yes                |       |
| As a user I want to select a difficulty.                                     | Implement level difficulties                 | Jaap-jan                                | 3                                       | 3                                    | yes                |       |
|  | Create new levels and buttons                | Tim                                     | 3                                       | 3                                    | yes                |       |
| As a student I want to criticize someone else's project.                     | Review the other team's code.                | Jurriaan, Govert, Jaap-jan, Tim en Erik | 20                                      | 10                                   | yes                |       |
| As a user I want to be able to play the game without unwanted interruptions. | Fix soundEffects randomly freezing the game. | Govert                                  | 1                                       | 1                                    | yes                |       |
